OBJECTIVE

Driven engineering student with practical experience in Java and Python programming, data analysis, cloud services, and problem-solving. Eager to create scalable solutions and gain insights from real-world engineering challenges. Seeking the Internship to enhance my development skills while contributing to meaningful projects.

ACADEMIC DETAILS

- B.Tech (CSE – AIML), Dayananda Sagar University, Harohalli — CGPA: 6.88 (2027)
- 12th Grade: 91.33%
- 10th Grade: 92.64%

SKILLS

- Programming: Java ,Python, SQL, C (basics),Node.js.
- Algorithms & Data Structures: Sorting, searching, greedy, DP, trees, graphs
- Data Analysis: Pandas, NumPy, Matplotlib, data cleaning, EDA
- Big Data: Apache Spark (RDD/DataFrame operations)
- Cloud: AWS (S3, Lambda, EC2 basics)
- Software Development: Git, debugging, API integration, clean coding

PROJECTS

1. Smart Agriculture Monitoring System (IoT + Data Analytics)

- Raspberry Pi 3B+, BH1750, DHT11, Motion Sensor, Python, AWS S3
- Built a real-time crop-monitoring system capturing humidity, soil moisture, and light intensity.
- Processed sensor data using Python and visualized trends.
- Stored time-series data in AWS S3 for cloud-based analysis.
- Improved alert accuracy by 28% using threshold-based algorithms.

2. Movie Recommendation Tool (Algorithms + Python)

- Python, Pandas, Cosine Similarity, Data Analysis
- Developed a recommendation system using similarity algorithms.
- Applied feature engineering & data cleaning.
- Designed a CLI interface for top 10 movie suggestions.

3. Distributed Log Analyzer (Spark Project)

- Apache Spark, PySpark, SQL
- Processed 1M+ server logs using Spark DataFrames.
- Reduced execution time from 45s to 9s using partitioning & caching.
- Built insights dashboards for error frequency and patterns.

ACHIEVEMENTS

- Participated in FOSS Meet, contributed to open source
- Completed AWS Cloud Practitioner Essentials (self-learning).
- Participated 3 Hakathons and One Protothon.
- Published an Article based on Artificial intelligence and Bias.

COURSEWORK

Data Structures & Algorithms, DBMS, Cloud Computing, Operating Systems, Machine Learning (Basics)

STRENGTHS

Analytical thinking, teamwork, fast learner, building scalable real-world solutions
